Education

University of Wollongong
Bachelor's Degree, Cyber Security.

Singapore
December 2022

Temasek Polytechnic
Diploma, Information Technology

Singapore
December 2020

Experience

Accenture Pte Ltd
Security Engineer

Singapore
April 2025 - Present

- Assess and enhance existing security controls across infrastructure and applications
- Support operations to ensure deliverables comply with security requirements and standards
- Develop security documentation (design docs, System Security Acceptance Test documents, technical presentations)
- Monitor and analyze alerts from SIEM (Splunk), IDS/IPS, firewalls, Trend Micro Vision One, and other security platforms
- Manage and review privileged access activities (CyberArk PAM)
- Investigate security incidents to determine root cause, impact, and severity
- Execute incident response procedures and coordinate containment and remediation
- Work with third parties on forensics, VAPT (Vulnerability Assessment & Penetration Testing), and WPT (Web Penetration Testing)
- Collaborate with IT and application teams to implement security controls and mitigate risks
- Develop security automation tools, including a File Integrity Monitoring (FIM) web defacement detection solution for internal/intranet environments
- Maintain and update security documentation, incident reports, playbooks, and SOPs
- Stay current with emerging threats, vulnerabilities, and cybersecurity trends
- Prepare security reports, risk findings, and recommendations for stakeholders/clients
- Provide ongoing security advisory and operational support to clients

Ensign InfoSecurity
SOC Analyst

Singapore
Oct 2023 – April 2025

- Investigate security events using logs from SIEM, EDR, firewalls, endpoints, and authentication systems
- Conduct initial incident analysis on network anomalies, endpoint threats, and suspicious activities
- Support threat hunting, vulnerability monitoring, and policy/data loss violation detection
- Liaise with customers during incidents to identify root cause and recommend mitigation/remediation
- Handle Change Requests, Service Requests, and incident-related enquiries
- Assist in improving incident response workflows, SOPs, and detection use cases
- Translate threat intelligence into actionable detections
- Develop and tune detection logic in SIEM/EDR platforms
- Produce CVE reports and security advisories based on emerging threats.
- Contributed to MSSP tender proposals (SOC & detection capabilities)
- Built a sound-triggered alert system for critical events
- Developing a Query Converter tool for cross-platform detection queries

Professional Certification

SANS, GIAC Certification
GIAC Certified Incident Handler (GCIH)
GIAC Certified Intrusion Analyst (GCIA)

Singapore
August 2024
