Education

University of Wollongong
Bachelor's Degree, Cyber Security.

Singapore
December 2024

Temasek Polytechnic
Diploma, Information Technology

Singapore
December 2020

Experience

Accenture Pte Ltd
Security Engineer

Singapore
April 2025 - Present

- Monitor, triage, and investigate security alerts using SIEM and security platforms including Splunk, Microsoft Sentinel, IDS/IPS, firewalls, and Trend Micro Vision One.
- Perform security incident investigation and response for suspected or confirmed breaches, including root cause analysis, impact assessment, containment, and remediation coordination.
- Stay current with emerging threats, vulnerabilities, and cybersecurity trends to continuously improve security operations.
- Manage and review privileged access activities using CyberArk PAM to ensure secure administrative operations and compliance.
- Assess and enhance security controls across infrastructure, applications, and cloud environments to meet organizational and regulatory requirements.
- Conduct risk assessments to identify, evaluate, and communicate security risks across projects and systems.
- Support risk reporting, control evaluation, and security advisory functions to improve organizational risk posture.
- Secure and manage cloud infrastructure within Microsoft Azure environments, including configuration and governance of Network Security Groups (NSGs) and certificate lifecycle tracking.
- Manage incident tracking and remediation workflows through Azure DevOps.
- Implement and validate cloud security controls aligned with enterprise security architecture and operational requirements.
- Designed and developed an automated risk assessment web portal to calculate risk scores and present findings to stakeholders and clients.
- Develop security automation solutions, including a File Integrity Monitoring (FIM) web defacement detection system for internal and intranet environments.
- Develop and maintain security documentation including architecture design documents, incident reports, playbooks, and SOPs.
- Collaborate with internal IT, application teams, and third-party vendors on digital forensics, Vulnerability Assessment (VA), and Web Penetration Testing (WPT).
- Support operational teams to ensure project deliverables meet defined security requirements, standards, and best practices.
- Prepare security reports, risk findings, and actionable recommendations for stakeholders and clients.

SOC Analyst

Oct 2023 – April 2025

- Investigate security events using logs from SIEM, EDR, firewalls, endpoints, and authentication systems
- Conduct initial incident analysis on network anomalies, endpoint threats, and suspicious activities
- Support threat hunting, vulnerability monitoring, and policy/data loss violation detection
- Liaise with customers during incidents to identify root cause and recommend mitigation/remediation
- Handle Change Requests, Service Requests, and incident-related enquiries
- Assist in improving incident response workflows, SOPs, and detection use cases
- Translate threat intelligence into actionable detections
- Develop and tune detection logic in SIEM/EDR platforms
- Produce CVE reports and security advisories based on emerging threats.
- Contributed to MSSP tender proposals (SOC & detection capabilities)
- Built a sound-triggered alert system for critical events
- Developing a Query Converter tool for cross-platform detection queries

A-Smart Holdings Ltd

Singapore

Augmented Reality Consultant

Jul 2019 – Dec 2019

- Assisted in the development and testing of augmented reality (AR) experiences, including smart mirror solutions for virtual clothing and visualization
- Supported implementation of interactive technologies such as holographic displays and smart environment integrations
- Helped design and validate voice-controlled smart home interactions using Google Home Mini
- Developed and tested structured voice prompts to enable device control and responsive automation within smart home systems
- Performed functional testing to ensure reliable responses between voice commands and connected IoT devices
- Supported troubleshooting, optimization, and user experience improvements for AR and smart home applications
- Collaborated with the team to prototype and demonstrate immersive retail and smart living concepts
- Documented testing results, configurations, and implementation workflows for internal reference

NCS Group

Singapore

Roving Technical Assistant

Jul 2016 – Dec 2016

- Provided on-site technical support across multiple locations, troubleshooting hardware, software, and network issues
- Assisted users with workstation setup, system configuration, and basic IT problem resolution
- Performed installation, maintenance, and replacement of IT equipment including desktops, laptops, and peripherals
- Supported deployment of operating systems, enterprise applications, and security updates
- Escalated complex technical issues to specialized support teams and followed up on resolution status
- Conducted routine system checks to ensure devices and network connectivity were functioning properly
- Assisted with IT asset handling, inventory tracking, and equipment movement between sites
- Documented service activities, incident details, and resolutions according to operational procedures
- Provided user guidance on basic IT usage and best practices to minimize recurring issues

Professional Certification**SANS, GIAC Certification**

Singapore

GIAC Certified Incident Handler (GCIH)

August 2024

GIAC Certified Intrusion Analyst (GCIA)

Ongoing
